

Kirei and LEED ®

Kirei Board is made from rapidly renewable, reclaimed agricultural fiber, with a low-VOC emission adhesive. While LEED does not certify materials, Kirei Board can help your projects gain credit toward LEED Certification under the following

LEED Credits:

Related LEED Credits:

Materials and Resources – Credit 4 – Recycled Content

Indoor Environmental Quality – Credit 4.1 Low-emitting adhesives and sealants

Materials and Resources – Credit 6 – Rapidly Renewable Resources

Supporting documentation for LEED certification is available upon request
